

Tasks and Power of the Council of Scientific Research at the University

1. Setting the general policies for scientific research at the University and the means of implementing them and setting plans for scientific research and submitting them to the council of deans.
2. Preparing the necessary instructions to organize, encourage, coordinate, support, follow up, evaluate and publish scientific research.
3. Establishing the necessary rules and requirements for preserving the rights of the University and researchers of scientific research and its results, in a way that does not contradict with the patent rights and the publication in practice in the Hashemite Kingdom of Jordan.
4. Discussing the annual estimated budget for scientific research.
5. Supervising the publishing of magazines or scientific researches in specialized periodicals.
6. Approving financial support for research projects and publication of scientific research and papers submitted by the faculty members and full-time lecturers.
7. Any other issues related to scientific research.
