

SDG 14: life under water

This objective is one of the important sustainable development ones and has a great impact on life. Amman Arab University had a role in this goal through:

1. The university worked to allow faculty members and administrative staff and their students to participate in workshops and seminars that support modern methods of conserving water wealth.
2. Supporting scientific research related to the conservation of water resources.

"The Sustainable Development objectives are more important today than ever before. Now is the time to secure the well-being of people, economies, societies and our planet."

Antonio Guterres

- - Secretary-General of the United Nations
