INDUSTRY
INNOVATIONS AND
INFRASTRUCTURE

SDG 9 : Industry, innovation and infrastructure

Investments in industry, infrastructure and innovation are critical factors for economic growth and development. Technological progress is essential to finding lasting solutions to economic and environmental challenges, such as creating new job opportunities. Promoting sustainable industries and investing in scientific research and innovation are all important ways to promote sustainable development.

The university also has a center dedicated to entrepreneurship and innovation, which is a center dedicated to incubating businesses and providing business support services to help entrepreneurs and companies and those who have an idea to start a business or an existing business and wish to develop it and develop social responsibility through the implementation of community initiatives.

Amman Arab University has worked:

1. Introducing new educational programs to teach leaders of the future the multi-disciplinary challenges of sustainable development. The Entrepreneurship and Innovation course has been introduced.
2. Enhancing research programs in universities on sustainable development, where there is a center dedicated to entrepreneurship and innovation.
3. Increasing training programs for faculty members and technical staff on sustainable development. A training workshop on the importance of artificial intelligence was held.

"The Sustainable Development objectives are more important today than ever before. Now is the time to secure the well-being of people, economies, societies and our planet."

Antonio Guterres

- - Secretary-General of the United Nations

Entrepreneurship and Excellence
