

SDG 8: Decent work and Economic Growth

Promote Sustained Inclusive and Sustainable economic growth, full and productive employment and decent work for all

The Sustainable Development Goals call for sustained economic growth and increased levels of productivity and technological innovation, and in this regard, encouraging entrepreneurship, creating job opportunities and taking the necessary measures. To achieve this goal, Amman Arab University played an important role through:

- Graduating students with scientific and practical skills and experience that match the requirements of the labor market.
- The university holds workshops related to the economy with the participation of groups from the local community and the university community (faculty members and students).
- Signing agreements with companies, institutions and ministries related to holding training courses and scientific workshops through which the student's personality is refined and he is ready for the labor market.

Workshop on "Income and Sales Tax" for Amman Arab University Students

The Deanship of Student Affairs / Career Guidance and Alumni Follow-up Office at Amman University, in cooperation with the College of Business at the University, held a training workshop entitled "Income and Sales Tax" presented by faculty member at the college, Dr. Bilal Zureiqat. The implementation of that workshop came as one of the training workshops implemented by the office within the student and inquiries between the coach and the students.

An advanced Workshop in Analyzing Financial Markets for "Amman Arab University" Students

The Deanship of Student Affairs / Career Guidance and Alumni Follow-up Office at Amman Arab University, in cooperation with the College of Business at the University and the Ideal Financial Accreditation Company, held a training workshop entitled "Basic and Technical Analysis in Financial Markets (Coins, Minerals and Financial Indicators)" presented by the Chief Locals in the Ideal Financial Accreditation Company, Mr. Muhannad Saed.

The implementation of this workshop came as one of the training courses and workshops implemented by the office within the student's skills portfolio, which qualifies the student to the labor market. This training workshop aimed to develop students' investment skills by introducing them to the different strategies for trading and how to manage risks, which would prepare students for the labor market and keep them up with everything new in the field investment.

College of Business at Amman Arab University's Grants its Students the Application of Academia with Industry

In order to enable the interactive relationship between the faculty member and students and the importance of creating a collective learning environment, and in order to develop the relationship between the University and economic institutions in the Kingdom, and as the student is the focus of the educational process at the university, College of Business at Amman Arab University seeks to move away from indoctrination in science to creativity in learning through sharing of knowledge with economic institutions.

To consolidate this concept, College of Business, through the Supply Chain Management course, visited Lafarge Concrete Company in order to link academic concepts on the ground to identify their strategies in supply chain management. In this regard, the course teacher Dr. Muti Al-Shibli stressed that such scientific visits would consolidate the academic concept among students by living with practical application on Competitive to be an added value for business

It is noteworthy that the way companies use technologies in the field of supply chain in the Fourth Industrial Revolution is fundamentally different from the way they were used previously. For example, in the field of maintenance, companies usually wait for devices to malfunction until they repair them. At this time, smart technology has changed this approach.

Pioneering and Excellence
